

7. Jill gave money to a charity over a 20-year period, from Year 1 to Year 20 inclusive. She gave £150 in Year 1, £160 in Year 2, £170 in Year 3, and so on, so that the amounts of money she gave each year formed an arithmetic sequence.

(a) Find the amount of money she gave in Year 10. (2)

(b) Calculate the total amount of money she gave over the 20-year period. (3)

Kevin also gave money to the charity over the same 20-year period.

He gave £A in Year 1 and the amounts of money he gave each year increased, forming an arithmetic sequence with common difference £30.

The total amount of money that Kevin gave over the 20-year period was **twice** the total amount of money that Jill gave.

(c) Calculate the value of A. (4)

**Question 7 continued**

Leave  
blank

Lined area for writing the answer to Question 7.

8.

**Figure 1**

Figure 1 shows a sketch of part of the curve with equation  $y = f(x)$ .

The curve has a maximum point  $(-2, 5)$  and an asymptote  $y = 1$ , as shown in Figure 1.

On separate diagrams, sketch the curve with equation

- (a)  $y = f(x) + 2$  (2)
- (b)  $y = 4f(x)$  (2)
- (c)  $y = f(x + 1)$  (3)

On each diagram, show clearly the coordinates of the maximum point and the equation of the asymptote.

**Turn over**

Leave blank

9. (a) Factorise completely  $x^3 - 4x$  (3)

(b) Sketch the curve  $C$  with equation

$$y = x^3 - 4x,$$

showing the coordinates of the points at which the curve meets the  $x$ -axis. (3)

The point  $A$  with  $x$ -coordinate  $-1$  and the point  $B$  with  $x$ -coordinate  $3$  lie on the curve  $C$ .

(c) Find an equation of the line which passes through  $A$  and  $B$ , giving your answer in the form  $y = mx + c$ , where  $m$  and  $c$  are constants. (5)

(d) Show that the length of  $AB$  is  $k\sqrt{10}$ , where  $k$  is a constant to be found. (2)
